Microinvest Warehouse Pro

Microinvest Warehouse Pro (back office) is flexible inventory management product designed to automate all warehouse processes: from purchasing, monitoring inventory levels to tracking sales and operating cash flows. The solution handles the management of huge number of points of sales in real time. The application can be used in both single and distributed multi-terminal or even multi-location warehousing and point of sale installations via its powerful database SQL capabilities.

Company Overview:

Introducing its first complete Warehouse automation platform in 1995, **Microinvest** is now the largest provider of software solutions for wholesale and retail enterprises in Bulgaria, with 10.11% market share, serving thousands of customers with best-of-breed technology and services.

Since 2005 **Microinvest** starts aggressive marketing campaign for international distribution of its products. At the moment Microinvest products are distributed in USA, Romania, Greece, Cyprus, Russia, Malta, Kenya, Moldova and Georgia.

You are also welcome to join the world of **Microinvest**!

Key Features and Functions:

- Intuitive and easy-to-use interface;
- Fast and easy installation - no IT knowledge required to install or setup the program;
- Operational control via custom user access rights;
- It has a built in connection to a cash-register and barcode reader;
- Compatible with all printers;
- Generation of management reports, invoices or purchase orders in real time;
- Control for suppliers' payments and deliveries;
- Minimum stock quantities control;
- Generic hardware requirements: runs on any Windows-powered computer;
- Data import and exports from MS Excel;
- Support of different databases - MS Access, MSDE, MySQL Server, MS SQL Server, Oracle;
